Scale **1:100**
Title **ground view**
Date **28.11.2022**
Name **J. Boehm**

Size **A3**
Page **1-1**

Information on installation of slides
Care should be taken that slides are not oriented to a southeast and southwest direction (heating up of material). If this is not possible, appropriate measures must be taken to ensure the provision of shade. In the case of tunnel slides, this is only necessary for the open run-out area.

General information for clients
The client is responsible for checking that all conditions necessary for configuration of the children's playground equipment are met (space requirements, available space, necessary ground elevation, existing ground elevation, etc.). This also includes supply lines (under and above ground and consideration of any other possible constraints of the location). The client is to ensure on site that surfacing is constructed in compliance with EU standards on free height of fall.
